

Endosee Advance Accessories

Endosee Advance® offers a complete line of working channel instruments, enabling you to perform diagnostic and therapeutic procedures with maximum efficiency during in-office exams.

Instruments for In-Office Procedures

Integrated working channel enables the introduction of these specialized instruments to perform diagnostic and therapeutic procedures during in-office uterine assessment exams. Choose from a selection of sterile single-use tools or reusable stainless steel instruments based on preference and procedures including polypectomy, biopsy and transection of adhesions.
